Software as a Product

Product

A man-made artifact sold to customers in a market

Software

- Has an open-ended life-cycle: Is born, may life forever
- Typically requires upfront capital investment (development)
- Is cheap and easy to reproduce perfectly

Software as a product

- A product sold to either enterprise or retail customers
- What is sold is typically a usage right plus services

Core, Basic, and Whole Product

- Core product =
 - Core software
- Basic product = bundle of
 - Software + complementary materials + self-help services
 - Guarantees about fitness for use + indemnification
 - Support services
- Whole product = basic product +
 - Training
 - Consulting
 - Operations

Enterprise vs. Retail Customers 1/2

- Enterprise customers (B2B)
 - Are willing to trade money for time
- Retail customers (B2C)
 - Are willing to trade time for money

Enterprise vs. Retail Customers 2 / 2

"Some people spend time to save money, some spend money to save time." [M10]

Software Products, Projects, and Services

- Software products are provided by a software vendor
 - Commercial off-the-shelf software (COTS) ("Standardsoftware")
- Software products can be operated by service providers
 - Service providers specialize in specific products
- Software projects are performed by consulting firms
 - Custom software ("Individualsoftware")
- Many companies do all of the above

Software Projects

- Projects
 - A process with a defined start and a defined end
- Software projects
 - Revenues correlate with performed labor
 - Fixed price vs. actual labor
 - Accounted for as revenue and expenses

Software Products and Projects

Software Vendor

Product

Project

Widget Corp. BI Impl. 2008

High performance. Delivered.

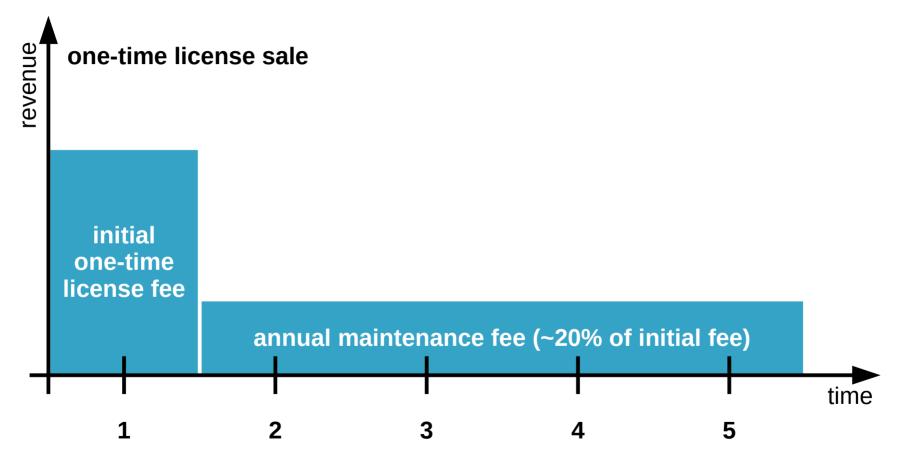

Continental Stages 2010

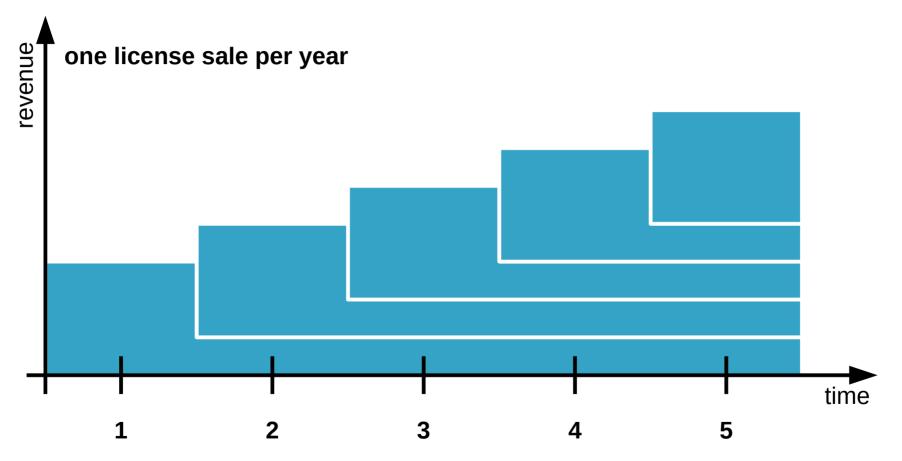

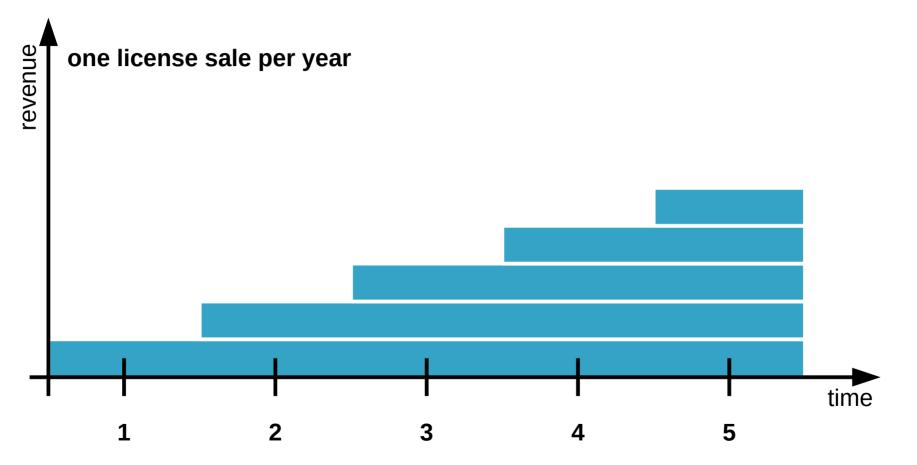

Software Product Revenue

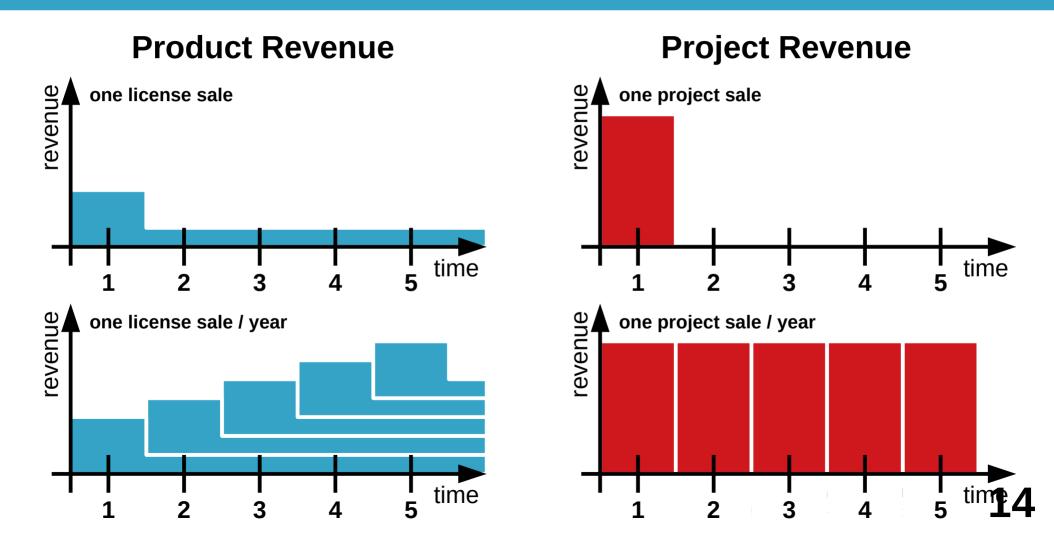

Accumulating Traditional Software Product Revenue

Accumulating Software Subscription Revenue

Software Product vs. Project Revenue

Software Product vs. Project Companies

	Consulting Firms (Custom Development)	Software Vendors (COTS Development)
Advantages	 Not capital intensive Can be started easily 	 Stable maintenance revenue High market capitalization
Disadvantages	 Somewhat fragile revenue Little long-term stability High business volatility Limited scalability 	 Hard to get started Requires upfront investment May be slow to react Most fail, few survive
